Details of how to submit an abstract, registration fees or for abstracts being published in Multidisciplinary Respiratory Medicine. A gentle reminder, the deadline for abstract submission is 8th May. The meeting will take place in Milan, Italy, and places are limited to 1500 delegates, so be quick!

Two lucky winners have been chosen! Congratulations to Dr Lotte Terpstra from the Netherlands and Onie Hove from the UK who have successfully secured their free place at the World Bronchiectasis Conference in Milan. We look forward to meeting with you!

EMBARC is delighted to announce that the first patient has been enrolled in the EMBARC study. Congratulations to Dr Stefano Aliberti in Italy for recruiting the first patient. EMBARC is a new European Registry for non-Cystic Fibrosis Bronchiectasis (NCFB) patients, and is aimed at increasing access to needed clinical data available in Europe.

Congratulations to Di Santolouis Alberto in Italy for recruiting the first patient. We look forward to working with you!

The new European Registry for non-Cystic Fibrosis Bronchiectasis (NCFB) is expected to expand the current knowledge in non-CF Bronchiectasis, and aims at an in-depth analysis, limited with clinical data available in Europe.

For further information about attending the meeting, please visit www.erscongress.org

Please remember to visit the EMBARC homepage for links to all the latest publications and news in regards to our Network.

The MREC score must be collected from the patient prior to the CSV page for submission, if no organism was detectable.

When completing Annual Reviews, all patients of the CSV will need to be asked to share any changes since the last review. This also applies to those who are having their final data captured due to withdraw / discharge or those who have died. Please follow the instructions directed by the eCRF.

It is the responsibility of each Centre to raise invoices for their recruitment. Delays in payment should be expected when instructions are not followed.
